Bulletin (New Series) of the American Mathematical Society

This journal is devoted to articles of the following types:

Bulletin Articles

Two types of articles will be included in this section: (1) papers that present a clear and insightful exposition of significant aspects of contemporary mathematical research, including Gibbs Lectures, Progress in Mathematics Lectures, and Retiring Presidential Addresses; and (2) brief, timely reports on important mathematical developments, which are normally solicited and often written by a disinterested expert.

Book Reviews

Book Reviews are accepted for publication by invitation only. Unsolicited manuscripts will not be considered.

Submission information. See **Information for Authors** at the end of this issue.

Publisher Item Identifier. The Publisher Item Identifier (PII) appears at the top of the first page of each article published in this journal. This alphanumeric string of characters uniquely identifies each article and can be used for future cataloging, searching, and electronic retrieval.

Postings to the AMS website. Articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue.

Subscription information. *Bulletin (New Series) of the American Mathematical Society* is published quarterly. The *Bulletin* is also accessible electronically, starting with the January 1992 issue, from `www.ams.org/publications/`. For paper delivery, subscription prices for Volume 38 (2001) are $318 list, $254 institutional member, $191 individual member. The subscription price for members is included in the annual dues. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $8.00; subscribers in India must pay a postage surcharge of $14.00. Expedited delivery to destinations in North America is $12; elsewhere $23.

Back number information. For back issues see the *AMS Catalog of Publications.*

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904. *All orders must be accompanied by payment.* Other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940-6248.

Copying and reprinting. Material in this journal may be reproduced by any means for educational and scientific purposes without fee or permission with the exception of reproduction by services that collect fees for delivery of documents and provided that the customary acknowledgment of the source is given. This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, or for resale. Requests for permission for commercial use of material should be addressed to the Assistant to the Publisher, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248. Requests can also be made by e-mail to `reprint-permission@ams.org`.

Excluded from these provisions is material in articles for which the author holds copyright. In such cases, requests for permission to use or reprint should be addressed directly to the author(s). (Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.)

Bulletin (New Series) of the American Mathematical Society is published quarterly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2294. Periodicals postage is paid at Providence, Rhode Island, and additional mailing offices. Postmaster: Send address changes to Bulletin, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

BULLETIN OF THE AMERICAN MATHEMATICAL SOCIETY

CONTENTS

Vol. 38, No. 1 January 2001

Research-Expository Surveys

Urmie Ray, Generalized Kac-Moody algebras and some related topics 1
Brian C. Hall, Harmonic analysis with respect to heat kernel measure 43

Book Reviews

Uta C. Merzbach (Reviewer), James Joseph Sylvester: Life and work in letters by Karen Hunger Parshall 79
Melvin Hochster (Reviewer), Multiplicities and Chern classes in local algebra by Paul C. Roberts 83
Wendell H. Fleming (Reviewer), Extending H_∞ control to nonlinear systems by J. W. Helton and M. R. James 93
Jacques Thévenaz (Reviewer), On the local structure of Morita and Rickard equivalences between Brauer blocks by Lluis Puig 97
Ezra Getzler (Reviewer), Frobenius manifolds, quantum cohomology, and moduli spaces by Yuri I. Manin 101
Miles Reid (Reviewer), Rational curves on algebraic varieties by János Kollár 109
M. Ram Murty (Reviewer), Elementary methods in number theory by Melvyn B. Nathanson 117

Vol. 38, No. 2 April 2001

Bulletin Articles

I. M. James, Portrait of Alexander (1888-1971) 123
Shreeram S. Abhyankar, Resolution of singularities and modular Galois theory 131
J. T. Stafford and M. Van den Bergh, Noncommutative curves and noncommutative surfaces 171

Book Reviews

Brayton Gray (Reviewer), Simplicial homotopy theory by Paul G. Goerss and John F. Jardine 217
Margaret Robinson (Reviewer), An introduction to the theory of local zeta functions by Jun-ichi Igusa 221
Dave Auckly (Reviewer), 4-manifolds and Kirby calculus by Robert Gompf and András Stipsicz 229
Helmut Völklein (Reviewer), Inverse Galois theory by G. Malle and B. H. Matzat 235

John McCleary (Reviewer), Rings, modules, and algebras in stable homotopy theory by A. D. Elmendorf, I. Kriz, M. A. Mandell, and J. P. May, with an appendix by M. Cole; Equivariant homotopy and cohomology theory by J. P. May, with contributions by M. Cole, G. Comezaña, S. Costenoble, A. D. Elmendorf, J. P. C. Greenlees, L. G. Lewis, Jr., R. J. Piacenza, G. Triantafillou, and S. Waner; A concise course in algebraic topology by J. P. May 245
Josef Dorfmeister (Reviewer), Harmonic maps, loop groups, and integrable systems by M. A. Guest 251
Irwin Kra (Reviewer), Quasiconformal Teichmüller theory by F. P. Gardiner and N. Lakic 255
Yujiro Kawamata (Reviewer), Birational geometry of algebraic varieties by János Kollár and Shigefumi Mori, with the collaboration of C. H. Clemens and A. Corti 267

Vol. 38, No. 3 **July 2001**

Bulletin Articles

Ole Christensen, Frames, Riesz bases, and discrete Gabor/wavelet expansions 273
Eknath Ghate and Eriko Hironaka, The arithmetic and geometry of Salem numbers 293
Ronald Solomon, A brief history of the classification of the finite simple groups 315

Book Reviews

Karsten Grove (Reviewer), Metric structures for Riemannian and non-Riemannian spaces by M. Gromov 353
Ranjan Roy (Reviewer), Complex analysis, fundamentals of the classical theory of functions by John Stalker 365
Vaughan F. R. Jones (Reviewer), Quantum symmetries on operator algebras by D. Evans and Y. Kawahigashi 369
Robert Gross (Reviewer), Diophantine geometry: An introduction by Marc Hindry and Joseph H. Silverman 379
Harm Derksen (Reviewer), Classical invariant theory by Peter Olver 383

Vol. 38, No. 4 **October 2001**

Bulletin Articles

Pierre Cartier, A mad day's work: From Grothendieck to Connes and Kontsevich The evolution of concepts of space and symmetry 389

János Kollár, Which are the simplest algebraic varieties? 409
Philippe Biane, Jim Pitman, and Marc Yor, Probability laws related to the Jacobi theta and Riemann zeta functions, and Brownian excursions 435

Book Reviews

Igor Dolgachev (Reviewer), The geometry of schemes by David Eisenbud and Joe Harris 467
Alexander Lubotzky (Reviewer), Profinite groups by J. S. Wilson; Profinite groups by L. Ribes and P. Zalesskii; Analytic pro-p groups by J. D. Dixon, M. P. F. du Sautoy, A. Mann, and D. Segal; New horizons in pro-p groups by M. du Sautoy, D. Segal, and A. Shalen (eds.) 475
Mikhail Kapranov (Reviewer), Gröbner deformations of hypergeometric differential equations by M. Saito, B. Sturmfels, and N. Takayama ... 481
Louis H. Kauffman (Reviewer), Quantum fields and strings: A course for mathematicians, Volumes 1 and 2 by Pierre Deligne, Pavel Etingof, Daniel S. Freed, Lisa C. Jeffrey, David Kazhdan, John W. Morgan, David R. Morrison, and Edward Witten (eds.) 489
John Hubbard (Reviewer), Dynamics in one complex variable, Introductory lectures by John Milnor 495
Bhama Srinivasan, Note from the book reviews editor 499
